All Phase Communications Reports Increased Demand for Cloud Workspace After Hurricanes Irma and Harvey

*Leading Unified Communications
Provider Educates Businesses on
Cloud Workspace to Avoid Future
Impact of Natural Disasters*

Seattle, WA – October 24, 2017 - All Phase Communications a leading provider of unified communications, has announced today that the company has experienced an increase in demand for cloud workspace following recent natural disasters. Unfortunately, hurricanes Irma and Harvey had an historic destructive impact on SMBs (Small to Mid-sized Businesses) in Florida and Texas. Many companies in these areas were either destroyed completely or severely damaged by mother nature. In the wake of these events, business owners regardless of geographic location are now contemplating how to better protect their company's IT network as well as their data. As a result, All Phase Communications has reported a growing interest in cloud workspace from local businesses. These types of natural disasters can cause irrevocable harm to businesses and although buildings can be replaced lost productivity and potential data loss cannot. In fact, the vast majority of businesses who face a major data loss, end up closing their doors permanently. Flooded server rooms or buildings torn into shambles, without a strong disaster recovery program can prematurely signal the end to an otherwise strong SMB.

Cloud workspace has the power to ensure business continuity and data

protection during catastrophic events because everything resides in the cloud. In layman's terms, cloud workspace virtualizes every component on a server and desktop computer. So instead of having a physical component such as servers on-site, which can become obsolete, security-breached or malfunctioning, all components are run through the cloud. For end users, this means that every single component of an employee's workstation will be available to them, regardless of where they're located or which device they happen to have with them. All software, data, file sharing capabilities, Microsoft programs, and line of business software is located in the cloud. Thus, cloud workspace provides greater security and accessibility versus traditional on-premise hardware.

"Natural disasters put people through so much hardship and the absolute last thing they need is to run into business problems after the dust has settled," stated Iain Beveridge, President of All Phase Communications. "Cloud workspace enables companies to withstand the forces of nature. Business owners that leverage this solution know that when these disasters strike, they can be rest assured that their company will continue to operate as long as it is safe for their employees to do so. It is not a surprise to see heightened awareness and demand for cloud workspace."

As a trusted technology advisor, All Phase Communications has spent

years implementing creative IT solutions for these types of situations. The company has invested time, resources and capital in identifying and deploying the right cloud workspace solution. "Regardless of where one lives, natural disasters exist," added Mr. Beveridge. "No one can escape mother nature; however, with cloud workspace businesses have a greater chance of survival."

About All Phase Communications

Founded in 1986, All Phase Communications is a customer-service oriented telecommunications company with more than 25 years experience in the industry. All Phase is a preferred installation provider with leading VoIP (Voice over Internet Protocol) technology partners including ShoreTel and Toshiba. As the name suggests, All Phase handles all phases of VoIP installation including network assessment, system design, project management, system implementation, system deployment and training, and system maintenance. Based in Shoreline, Washington, small, medium and large companies including City of Bellingham, Glacier Fish, Cutter & Buck, Cascade Valley Hospital and Clinics, Ben Bridge Jewelers have relied on All Phase for their VoIP expertise to gain a competitive advantage in the marketplace by reducing operating costs, streamlining customer service, and improving productivity.
